Subject index

Acetone treatment 242
– /diethylether extraction 495
Actinic keratosis 130
Adhesion receptors 304
Allelic loss 417
Annexin I 268
Arachidonic acid metabolism 137
Artificial epidermis 53

Barrier function 41, 107
Basal cell 53
Basement membrane zone 130
– – – antigens 53
– – – macromolecules 408
Beta$_2$-microglobulin 420, 422
Birbeck granules 429
Bone morphogenetic protein 285
Bovine pituitary extracts 484
Bradykinin receptor 133
Bullous pemphigoid antigens 142, 408

c-*kit* 380
– Ligand 273
Calcium 476
Catechol-*O*-methyltransferase 81
CD44 21
Cell cycle 115
– differentiation 115
– growth 123
– viability 443
Ceramide 350
Chemokine 471
Chemotaxis 18, 462
Chondrogenesis 285
Chondroitin 6-sulphate 130
Chymotrypsin-like serine protease 249
CLA 304
Clear cell sarcoma cell line 254
Colchicine 35
Collagen 425
– donor aging 391
– fibres 434
– metabolism 391
– solubility 490
– type IV 408
Complement 359
Contact allergy 97
– dermatitis 337, 359, 429
– hypersensitivity 69
Corneodesmosin 369
Cornification 369
Cryo-treatment 69
Cutaneous lymphomas 364
– malignant melanoma 417
– permeability barrier 242
Cyclin A 504
– D 504
Cytochrome P450 347
Cytokines 73, 300

Deletion 386
Dermal fibroblasts 312
Desmosomes 233, 369
Desquamation 249, 369
Dietary fatty acids 331
Differentiation 107, 123

d-Limonene 97
DNA synthesis 312

Ehlers-Danlos syndrome 425
ELAM-1, soluble 414
Elastic fibres 434
Electron microscopy 396
Endothelium 341
Eosinophils 312
Epidermis 6, 81, 504
Epidermolysis bullosa acquisita 35
– – herpetiformis 233
Epstein-Barr virus genome 364
E-Selectin, soluble 414
Essential fatty acid definity 242

Fas antigen 396
FcεRI 380
Fibroblast 133
– gene expression 408
– growth factors 484
Fibronectin 448
Fibrosis 312
Flow cytometry 115
Freeze-fracture electron microscopy 495

g-IP-10 471
Globulins 359
Glycolipids 481

Haematoporphyrins 300
Hair apparatus cells 484
Hairless mice 490
Heritability 12
Hexachlorobenzene 347
HLA-DR 87
HPLC 81
Hsp72 466
HuGRO 471
Human epidermal cells 268
– epidermis 261
– keratinocyte culture 115
– keratinocytes 278
Hyaluronan 21
Hydroperoxides 97
Hyperkeratosis 12

ICAM-1 466
Ichthyol 137
IL-8 471
Immunoblotting 295
Immunocompetent cells 87
Immunocytochemistry 429
Immunoelectron microscopy 448
Immunofluorescence 295
– method 142
Immunohistochemical 396
– assessment 455
Immunohistochemistry 62, 285, 304
Inflammation 137, 268, 341
Inhibitors 278
In situ hybridization 364
Integrin 6
Intercellular lipids 41
Interferon 73
Interfilamentous matrix 434

Interleukin-2 73
Intracellular calcium 123
Isotretinoin 104

Keratin intermediate filaments 233
Keratinization 455
Keratinocytes 123, 268, 273, 319, 396, 448, 466, 471, 476, 481
– differentiation 278
– gene expression 408
– proliferation 278

Laminin 408
Langerhans cells 69, 268, 429
Lesions 12
Leukotriene A_4 261
– B_4 137
Lichen sclerosus et atrophicus 434
Limonene synthesis 97
Lipids 107
– peroxides 47
Lipoxygenase 137
Liver 104, 347
Localization 448
Lung fibrosis 77
Lyso-PAF 376
Lysophosphatidylcholine 462
Lysophospholipids 462

Macrophages 341
Malignancy 504
Malignant melanoma of soft parts 254
Marsupial 12
Mass spectrometry 97
Mast cells markers 380
Melanocytes 12
Melanoma 73
– -associated antigens 254
Melanosome 254
Metallothionein 62
Metals 466
5-Methoxysoralen 30
Micronized form 30
Mitochondrial DNA 386
Mixed tumour of skin 285
Monoclonal antibodies 62

Neuropeptides 341
Neutrophils 18
Northern blotting 471

Oncogene 476
Organ culture 142

P-450 104
PASI 420, 422
Pemphigus antigens 142
– foliaceus 295
– vulgaris 295
Peptide leukotrienes 261
Peroxidation 481
Pharmacokinetics 30
Photochemotherapy 300
Photodynamic therapy 300
Photopheresis 18
Phototoxicity 331
